

# STONE FLOOR

## New Material What is STONE FLOOR ?

“Tiles” have a sophisticated ambiance and there are a variety of designs and can produce a space to be modern or classical when used in combination with interior goods.

Tiles are easy to maintain and so very popular to be used in restaurants, hotels, and houses.

However, existing tiles have some demerits, which are easily broken and difficult to be installed since they are made by stone only.

STONE FLOOR is completely new material to solve these demerits. STONE FLOOR is made by 70% stone and 30% plastic.

This mixture of materials has overcome the demerits of tile and realized a low price with maintaining tile's good point.

You can use it in many places like houses, hotels, and shops.
